

COVER LETTER

Hiring Manager
Amazon
Tower C, DLF Cyber City
Gurugram, Haryana – 122002
India

Dear Hiring Manager,

I am writing to express my interest in the technical role at Amazon as a DevOps Engineer, where I believe my skills and professional experience would add significant value to your team.

As a Computer Science Engineering graduate from Graphic Era Hill University, I have developed expertise in multiple programming languages including C, C++, Java, JavaScript, and Python. Throughout my academic career and professional development, I have consistently sought opportunities to apply these technical skills to practical challenges.

My professional journey has equipped me with valuable experience in cloud and DevOps technologies. As an AWS Certified Cloud SysOps Administrator, I understand the infrastructure needs of scalable applications and services. My experience with automation tools like Jenkins and advanced technologies such as Vertex AI for machine learning model deployment demonstrates my commitment to staying current with industry best practices.

What particularly attracts me to Amazon is your reputation for technical excellence combined with an unwavering focus on customer satisfaction. I admire how Amazon consistently leverages cutting-edge technology to solve complex problems while maintaining a seamless customer experience. This alignment of technological innovation with practical customer benefits resonates with my own professional philosophy.

I am particularly drawn to Amazon's culture of ownership and long-term thinking. These principles reflect my own approach to professional challenges, where I take personal responsibility for outcomes and prioritize sustainable solutions over quick fixes.

I welcome the opportunity to discuss how my technical background, problem-solving abilities, and professional mindset could contribute to Amazon's continued success. Thank you for considering my application.

Sincerely,
Siddhant Payal
